Conversion to SQL Server

The final phase of the conversion of CDLAC's online QRRP application database to SQL Server was completed Friday, February 2, 2018. The conversion successfully transferred all existing project data to the new database. It did not, however, transfer user logon information. You will be prompted to re-register upon first logging back in after the conversion, and you will need your CDLAC registration code and federal ID number to re-register. Please refer any questions to the general CDLAC email address: cdlac@treasurer.ca.gov .   Thank you.
