

CALReUSE

Brownfields Site Assessment Assistance

- The California Pollution Control Financing Authority (CPCFA) has implemented the California Recycle Underutilized Sites (CALReUSE) Assessment Program to assist with the reuse and redevelopment of underutilized properties with real or perceived contamination issues (brownfields).
- The CALReUSE Assessment Program addresses a funding and information gap in the development of brownfields to help bring these properties into productive reuse.
- CALReUSE Assessment Program provides forgivable loans to fund site assessment and characterization, technical assistance, remedial action plans and site access.
- Local government Strategic Partners that understand local community needs work in conjunction with CALReUSE staff to prioritize and select projects, approve loans and administer the Program.
- Those interested in participating in the CALReUSE Program should contact CALReUSE staff at the California Pollution Control Financing Authority (916) 654-5610 or local Strategic Partners.
