

**California Pollution Control
Financing Authority**

**CALIFORNIA RECYCLE
UNDERUTILIZED SITES
(CALReUSE)
PROGRAM**

**2013 ANNUAL REPORT
TO THE
CALIFORNIA STATE LEGISLATURE**

JUNE 2014

About the California Pollution Control Financing Authority:

Mission Statement: As public servants, we are committed to promoting access to capital through the delivery of diverse financing options to California business and environmental industries by being a:

- Driving force of public and private partnerships.
- Leader in offering customized risk mitigation tools.
- Facilitator of projects that protect and restore the environment.

The California Pollution Control Financing Authority (CPCFA) provides California businesses with financing options for pollution control facilities and small businesses. CPCFA, founded 41 years ago, administers programs serving a variety of goals, including:

- Helping businesses construct solid waste, recycling, water and wastewater projects as a conduit issuer of tax-exempt bonds.
- Assisting small businesses in obtaining loans for business start-up and expansion and working capital through the California Capital Access Program (CalCAP) and Collateral Support Program.
- Collaborating with the Air Resources Board (ARB) to provide lenders with loan loss reserve accounts to finance new, cleaner-burning heavy duty diesel trucks and buses.
- Transforming brownfields into vibrant housing and retail developments that enhance communities in the California Recycle Underutilized Sites Program (CALReUSE).

This annual report to the Legislature describing the CALReUSE is prepared pursuant to California Pollution Control Financing Authority's statute, Health and Safety Code section 44525.7, and the Housing and Emergency Shelter Trust Fund of 2006 (Proposition 1C) statute, Health and Safety Code section 53545.14(b).

CPCFA consists of:

Bill Lockyer, Chair
State Treasurer

John Chiang
State Controller

Michael Cohen, Director
Department of Finance

Attachment B: Remediation Program Grant and Loan Portfolio.....B-1

EXECUTIVE SUMMARY

This report of activities for the California Recycle Underutilized Sites Program (“CALReUSE” or “Program”), for the fiscal year ending June 30, 2013, is submitted pursuant to Health and Safety Code sections 44525.7 and 53545.14(b). Additional program information can be found at www.treasurer.ca.gov/cpcf/a/.

The Program is designed to encourage and assist in the rejuvenation and development of brownfield sites. The most risk for any development project occurs at the pre-development phase. For brownfield-based projects (as opposed to “greenfield” projects on previously undeveloped land), many developers are hesitant to invest funds because the ultimate costs of remediation—and subsequent development—are unknown, unclear, or cost-prohibitive. CALReUSE consists of two sub-component programs – the Assessment Program, which provides low cost loans to finance professional site assessments, and the Remediation Program, which provides loans and grants to finance brownfield cleanup activities. The Program helps accomplish a range of important public policy goals – from the protection of public health and safety to fostering redevelopment and the amelioration of urban blight.

Overall, 74 projects have been awarded brownfield financial assistance totaling over \$59 million. The Assessment Program has provided loans for 44 projects, and the Remediation Program has provided 29 grants and 1 loan for its 30 projects. The CALReUSE Program has provided brownfield financial assistance throughout the State of California, helping to finance projects throughout the length of California from Humboldt County to San Diego County.

Originally, the Authority worked in collaboration with qualified public and private sector entities to administer the Program referred to as “Strategic Partners”. These Strategic Partners had a broad understanding of the complexity of brownfield redevelopment. As the Program actualized the Authority brought the Statewide Strategic Partner administrative functions in-house in 2010. In 2013 the Authority began administrating the entire program in-house. Currently the Authority manages all Program files working directly with each borrower and has partners with the California Department of Toxic Substance Control for technical assistance services.

ASSESSMENT PROGRAM SUMMARY

The California Pollution Control Authority (“CPCFA” or “Authority”) provided its own general funds to support the Assessment Program with low interest loans up to \$125,000 to help finance the cost of brownfield site assessment and characterization, technical assistance, and remedial action planning. Due to the complexity of brownfield issues, in 2007 CPCFA increased the maximum loan amount to \$500,000.

Forty-four projects were awarded up to \$4,915,842 in loans from the Assessment Program; of that, \$3,557,689 or 72.4% has been disbursed to projects. Of the forty-four projects all have received disbursements of loan funds. Twenty of these loans, totaling \$1,340,379 have been repaid to the Authority, 18 loans totaling \$1,869,150 have been forgiven, and six loans are currently active and carry an outstanding balance of \$348,160.

Due to uncertain outcomes associated with site assessments and the difficulty in redeveloping contaminated sites, the Assessment Program was designed with a forgiveness provision. The forgiveness ratio benchmark for the Program was established at 60%. In fiscal year 2012-2013, Authority staff approved three forgiveness requests for a total of 18 loans forgiven – bringing the forgiveness ratio for the Program to 52.6%; below the forgiveness benchmark.

For borrower property owners who utilized assessment loan funds, the loan would become payable if the borrower obtains a grading or building permit for the property. In addition, the loan would become payable if the property is sold or transferred within 25 years from the date of forgiveness approval.

Staff is currently reviewing the Program to evaluate how it may continue to help finance the cost of brownfield projects and secure additional funding to do so. In the meantime, Authority staff transferred over \$4 million back to the Authority's Administrative Fund. These funds will be used to support the Authority's other programs.

A summary of the complete award portfolio can be found in Attachment A of this report.

REMEDIATION PROGRAM SUMMARY

The CALReUSE Remediation Program is a grant and loan program funded with \$60 million from Proposition 1C, the Housing and Emergency Shelter Trust Fund Act of 2006, further defined by the Legislature in the 2007-08 Budget Act and trailer bill.¹ Administered by the Authority in consultation with the California Department of Housing and Community Development, the Remediation Program finances brownfield cleanup that promotes infill residential and mixed-use development, consistent with regional and local land use plans.

Of the \$60 million allocated to the Program, the Authority awarded \$55 million to projects and \$5 million in administration costs for CPCFA and the California Department of Housing and Community Development. The Authority capped the funding award at \$5 million per project to ensure that more projects would receive the necessary funds for cleanup activities. Projects were evaluated and awarded according to the Remediation Program's regulations, including factors such as the creation of housing units, project readiness, public benefits, and geographical targets. By May 2009, all of the Authority's funding was awarded. Of the 34 projects receiving awards, 30 projects executed agreements with the Authority. Four projects declined their awards, and the funds were redirected to an underfunded project on a waiting list. The \$55 million that was awarded will assist in the creation of 6,139 housing units – a program investment of \$8,959 per unit.

¹ Senate Bills 77 and 86 of 2007 allocated \$60 million to CALReUSE to administer a program of "grants or loans... for the purpose of brownfield cleanup that promotes infill residential and mixed-use development, consistent with regional and local land use plans."

All 30 projects that executed grant or loan agreements are moving forward with their projects, with \$36,815,425 having been disbursed to fund brownfield remediation activities. The current status of these projects is:

- 15 have completed both remediation of the brownfield and development of the project, resulting in 1,469 housing units.
- 7 projects have completed remediation and are in the development process.
- 8 projects are currently conducting remediation activities.

A summary of the complete award portfolio can be found in Attachment B of this report.

Awardee	Type ²	Awarded	Funds Used to Date	Project Name	City	Information Regarding the Brownfield	Information Regarding the Development	No. Units Originally Proposed	Current No. of Units	ACD ³	Project Status ⁴
First Community Housing	G	\$957,730	\$957,730	Bay Avenue Senior Apartments	Capitola	The site was formerly used for agricultural purposes in the 1970's. The contaminants of concern included elevated levels of chlordane and dieldrin. The Brownfield Infill Project was completed in April 2011. Remediation activities primarily consisted of the abatement of existing buildings and excavation and disposal of contaminated soils.	The Infill Development Project was completed in June 2011. The project consists of a six-building campus serving 109 senior households.	109	109	2011 Q2	Remediation and Development Complete
Studio 15 Housing Partners, LP	G	\$244,560	\$52,183	Studio 15	San Diego	The site was formerly used by chemical companies in the 1900's. The contaminants of concern included petroleum hydrocarbons, chloroform, tetrachloroethylene, trichloroethylene, lead, and copper. The Brownfield Infill Project consists of ongoing groundwater and garage air sampling on the previously remediated site until April 2014.	The Infill Development Project was completed in April 2009. The project consists of a 275-unit affordable housing community targeted primarily to service workers. All of the units are fully furnished studio apartments.	275	275	2009 Q2	Remediation and Development Complete with O&M
First Community Housing	G	\$175,376	\$49,782	Fourth Street Apartments	San Jose	The site was formerly used for agricultural purposes from the 1930's to the 1970's. The contaminants of concern included asbestos, lead paint, and mercury. The Brownfield Infill Project was completed in October 2010. Remediation activities primarily consisted of demolition of an existing building and lead and asbestos abatement.	The Infill Development Project was completed in June 2012. The project consists of 100 energy-efficient, affordable rental apartments. Thirty-five of the units are allocated to residents with developmental disabilities.	100	100	2012 Q2	Remediation and Development Complete
Comm 22, LLC	G	\$1,500,000	\$3,782	Commercial and 22nd Street Mixed-Use Development	San Diego	The site was formerly used as the San Diego Unified School District's maintenance and operation center in the 1960's. The contaminant of concern included hydrocarbon impacted soils and groundwater. The Brownfield Infill Project is scheduled to be completed in early 2014. Remediation activities primarily consist of excavation and disposal of contaminated soils.	The Infill Development Project will consist of a mixed-use, transit-oriented development which combines affordable family and senior rental housing with child care facilities, office space, live/work lofts, for-sale row homes, and community-serving commercial and retail space. The Infill Development Project is scheduled to be complete in the fourth quarter of 2014.	252	200	2014 Q4	Remediation in Progress and Development On-Track
Housing Corporation of America (formerly Thomas Safran and Associates)	G	\$622,750	\$622,750	Carson City Center Senior Housing	Carson	The site was formerly used as an auto service center. The sole contaminant of concern was gasoline petroleum hydrocarbons. The Brownfield Infill Project was completed in October 2009. Remediation activities primarily consisted of removal and disposal of contaminated soils and ongoing operation and maintenance activities.	The Infill Development Project was completed in April 2011. The project consists of one building with three stories of affordable senior apartments over one level of commercial/retail space and two levels of subterranean parking.	86	86	2011 Q2	Remediation and Development Complete
Cedar Gateway, LP	G	\$94,330	\$94,330	Cedar Gateway	San Diego	The site was formerly used as a service station and automobile repair facility. The sole contaminant of concern was lead. The Brownfield Infill Project was completed in October 2010. Remediation activities primarily consisted of removal and disposal of contaminated soils.	The Infill Development Project was completed in February 2012. The project consists of 65 affordable rental apartment units with access to transit and downtown job centers.	65	65	2012 Q1	Remediation and Development Complete

Awardee	Type ²	Awarded	Funds Used to Date	Project Name	City	Information Regarding the Brownfield	Information Regarding the Development	No. Units Originally Proposed	Current No. of Units	ACD ³	Project Status ⁴
Capitol Station 65 LLC	G	\$550,000	\$467,467	Township 9	Sacramento	The site was formerly used as a cannery in the 1930's. The contaminants of concern were the levels of gasoline and benzene on the site. The Brownfield Infill Project was completed in December 2010. Remediation activities primarily consisted of removal and disposal of contaminated soils.	The Infill Development Project will consist of a 90-unit project including 89 affordable rental apartment units as part of a larger 65-acre, urban scale, mixed-use, transit-oriented, master-planned neighborhood. The Infill Development Project is scheduled to be completed in the third quarter of 2014.	90	90	2014 Q3	Remediation Complete and Development On-Track
LTSC Community Development Corporation and Pilipino Worker's Center	G	\$957,750	\$957,750	PWC Family Housing	Los Angeles	The site was formerly used as an oil field from the 1930's to the 1960's. The contaminant of concern included petroleum hydrocarbons. The Brownfield Infill Project was completed in the third quarter of 2012. Remediation activities primarily consisted of removal and disposal of contaminated material.	The Infill Development Project will create a 45 unit complex. Forty-Four of the units will be permanent affordable housing for the under-served, low-income community in the Historic Filipinotown neighborhood of Los Angeles. The Infill Development Project is scheduled to be completed in October of 2013.	47	45	2013 Q3	Remediation Complete and Development On-Track
MSPDI Turk, LLC	G	\$625,000	\$625,000	1345 Turk Street Affordable Condominiums	San Francisco	The site was formerly used for transportation related services from 1886 to 2004. The contaminants of concern were petroleum hydrocarbons and metals. The Brownfield Infill Project was completed in December 2009. Remediation activities consisted of removal and disposal of contaminated materials.	The Infill Development Project was completed in April 2012. The project created 32 units of for-sale affordable condominium housing.	32	32	2012 Q2	Remediation and Development Complete
Rockwood Christie, LLC (formerly TMG Partners, LLC)	G	\$5,000,000	\$1,060,649	64th and Christie Site	Emeryville	The site was formerly used as a parking lot and an auto transmission operation. The contaminants of concern include petroleum hydrocarbons, toluene, benzene, and xylene. The Brownfield Infill Project was complete in the second quarter of 2013. Remediation activities consisted of removal and disposal of contaminated soil.	The Infill Development Project will create 189 units of rental housing, including 34 affordable units. The project is part of the larger, overall Marketplace Redevelopment Plan which recently received LEED Platinum certification. The Infill Development Project is scheduled to be completed in the third quarter of 2014.	217	190	2014 Q3	Remediation Complete and Development On-Track
5110 Telegraph, LLC	L	\$151,500	\$0	CIVIQ	Oakland	The site was used for nursery greenhouses and plant storage for nearly 70 years. The contaminants of concern included organic pesticides and arsenic.	The project, which would have created 67 units of rental housing and 2,990 square feet of commercial space was withdrawn, as the awardee determined that program funds were not necessary to move forward with the project. The award was returned to CPCFA and funds were redirected to the Miramar Village project which had received only partial funding.			N/A	Award Declined by Borrower

Urban Preservation Foundation (formerly Martin Building Company)	G	\$2,148,471	\$2,148,471	2235 Third Street	San Francisco	The site was formerly used as a scrap iron and metal yard. The sole contaminant of concern included lead in the soil. The Brownfield Infill Project was completed in December 2010. Remediation activities primarily consisted of excavation and disposal of contaminated soils, and installation of a concrete slab cap as a barrier against hazardous vapors.	The Infill Project was completed in the fourth quarter of 2012. The project consists of 39 affordable and 157 market-rate rental units as part of a 50,000-square-foot project that restored two historic buildings, created 17,000 square feet of retail space, maintained 1,000 square feet of open space, and provided 157 below-ground parking spaces.	179	196	2012 Q4	Remediation and Development Complete
Bridge Economic Development Corporation	G	\$999,110	\$999,110	St. Joseph's Senior Apartments	Oakland	The site was formerly used as a convalescent home and a commercial facility. The contaminants of concern were asbestos and lead-based paint. The Brownfield Infill Project was completed in August 2010. Remediation activities included abatement and disposal of lead and asbestos containing materials.	The Infill Development Project was completed in January 2012. The project consists of an 84-unit affordable rental community. A third of the units are set aside for seniors with long-term chronic health conditions.	84	84	2012 Q1	Remediation and Development Complete
MacArthur Transit Community Partners, LLC	G	\$2,981,000	\$2,534,814	MacArthur Transit Village	Oakland	The site was formerly used as an automotive repair garage and a dry-cleaning operation. The contaminants of concern are volatile organic compounds, as well as petroleum hydrocarbons and related compounds. The Brownfield Infill Project is scheduled to be completed in the first quarter of 2014. Remediation activities primarily consist of excavation and disposal of contaminated soils.	The project will create 312 for-sale and rental units. Four of the 222 for-sale units will be affordable. All 90 rental units will be affordable. The project is part of a larger 8-acre development project. The larger project will include 624 residential units, 42,500 square feet of neighborhood-serving retail space, a 5,000-square-foot child care facility, and a 400-space parking garage for BART patrons. The Infill Development Project is scheduled to be completed in the fourth quarter of 2016.	312	312	2016 Q4	Remediation in Progress and Development On-Track
Lille Mae Jones Plaza, LP (formerly Community Housing Development of North Richmond)	G	\$284,589	\$23,890	Lillie Mae Jones Plaza	Richmond	The site was formerly used as a hardware store, harness business and a carpentry shop. The sole contaminant of concern was high concentrations of lead in the soil. The Brownfield Infill Project was completed in March 2010. Remediation activities included excavation and disposal of contaminated soils and placement and compaction of clean backfill material.	The Infill Development Project was completed in April 2011. The project consists of 26-units of affordable rental housing unit and includes supportive units for homeless and special needs populations.	26	26	2011 Q2	Remediation and Development Complete
City and County of San Francisco as Successor Agency to the San Francisco Redevelopment Agency	G	\$5,000,000	\$6,000	Hunters Point Shipyard	San Francisco	The site was formerly used as a naval shipyard and for the dismantling of commercial vessels. The contaminants of concern include volatile organic compounds, asbestos and lead-based paint. The Brownfield Infill Project is scheduled to be completed in the third quarter of 2016. Remediation activities primarily consist of lead and asbestos abatement.	The project will create 1,128 residential units, 20% of which will be affordable. The project is part of the larger 700-acre Hunters Point Shipyard and Candlestick Point mixed-use development project. The larger project will provide retail space, artist studios and 243 acres of parks and open space. The Infill Development Project is scheduled to be completed in the fourth quarter of 2017. The project has been delayed due to the elimination of the redevelopment agencies and the inability to secure the transfer of brownfield parcels currently owned by the United States Navy.	2,625	1,128	2017 Q4	Remediation in Progress and Development Delayed
