How to use this list

1. Locate your Eligible Energy Measure (EEM) on the table. To qualify for financing, EEMs must be Title 20 or Title 24 compliant.
2. Check the Program Requirements on the table (e.g., ENERGY STAR) to confirm that your measure is eligible
3. EEMs must be installed by a [GoGreen Home contractor](#). Measures that are eligible for self-install have a checkmark in the SI column and do not require a GoGreen Home contractor.
4. EEMs with a checkmark in the Investor Owned Utility (IOU) column are available to customers who receive service from at least one IOU (PG&E, SoCalGas, SCE or SDG&E).¹ Exceptions are indicated for gas measures by the footnote below and any notes by the measure name.
5. EEMs with a checkmark in the Publicly Owned Utility (POU) column are available for those with only POU service (SMUD, LADWP, etc.).

For more information on project eligibility, please review the [Project Eligibility Requirements](#).

¹ Customers who receive electricity from an IOU but gas from a source other than PG&E, SoCalGas or SDG&E (e.g., propane provider, Southwest Gas, or a publicly owned utility such as City of Long Beach) may apply no more than 30% of the loan toward gas measures.

Building Envelope Measures				
Air Sealing - Whole Building This measure may trigger combustion appliance safety testing. Learn more.		✓		BE-AIRS
Attic Insulation Must meet the standards specific to the climate zone		✓		BE-INSA
Cool Roof Products must meet GoGreen Home Cool Roof Eligibility Requirements . Note: Financing available only for customers who receive electricity from PG&E, SCE, or SDG&E.		✓		BE-ROOF
Floor Insulation Must meet the standards specific to the climate zone		✓		BE-INSF
Heat Reflective Coating Product must have solar reflectance ≥ 0.5 as tested to ASTM C1549-16		✓	✓	BE-RADC
Insulated Siding Siding panels with rigid foam insulation backing		✓		BE-INSS
Radiant Barrier Installed in the attic per manufacturer installation requirements		✓		BE-RADB
Wall Insulation Must meet the standards specific to the climate zone		✓		BE-INSW
Window Coverings: Exterior Must be attached to the building structure. Eligible: solar screens, roller shade/shutters, louvered shutters, and awnings.		✓	✓	BE-WCEX
Window Coverings: Interior Must be installed in a conditioned space and cover the entire window aperture, specified window coverings. Eligible: cellular shades, window quilts, or roman shades. Not Eligible: Louvered blinds or shutters; drapes; curtains; sheer, roller, or pleated shades; solar screens.	✓	✓		BE-WCIN
Window Film May only be installed in conditioned spaces	✓	✓		BE-WFLM
Windows/Glass Doors May only be installed in conditioned spaces		✓		BE-WIND
Clean Energy				
Solar Photovoltaic + Battery Storage Must be installed together as a new pair of measures. Eligible PV modules and eligible inverters .		✓	✓	CE-SOBT
Battery Storage Must be installed with an existing solar photovoltaic system. Eligible energy storage systems.		✓	✓	CE-BATT
Demand Response Measures				
Thermal Energy Storage (TES) System Must be used to shift energy usage to an off-peak time period on a recurring basis, referred to as permanent load shifting (PLS)		✓	✓	DR-TESS
