Project: Purchase and renovate a facility to develop a new dental clinic with seven new dental operatories

Summary of Project:

Community Medical Centers, Inc. (Grantee) plans to purchase and renovate a facility to develop a new dental clinic with seven new dental operatories in San Joaquin County that will provide dental services for special health care needs patients, including children and adults, who have disabilities that prevent them from receiving routine or specialty care due to their physical, developmental, or cognitive condition. The new clinic will increase access to care for low-income and Medi-Cal special health care needs patients as there are few to zero providers in the area providing specialty care that accepts Medi-Cal, in addition to integrating patients with the Grantee’s whole-person care services, where medical providers coordinate with dental providers on screening and referrals to close gaps in dental care. The Grantee anticipates the new dental clinic will serve approximately 2,000 special health care needs patients annually. Upon completion of the project, special health care needs patients will constitute 50 percent or more of the total number of patient visits of those receiving dental services in the project paid for with grant funds. Grant funds will be used for the purchase of real property, renovation expenses, and the purchase of equipment and furnishings. Additional leveraged funding will be used to cover expenses that exceed the grant award amount. Staff evaluated the plan and has determined that the project is likely to be feasible and sustainable.
