Project: Renovate an existing facility to develop an ambulatory surgery center, with four operating rooms and a multidisciplinary advanced care clinic, with eight new dental operatories and five mixed medical/dental treatment rooms.

Summary of Project:

University of the Pacific, Arthur A. Dugoni School of Dentistry (Grantee) plans to renovate an existing facility to develop a 23-hour ambulatory surgery center (ASC) and a multidisciplinary advanced care clinic (MDAC) in San Francisco County that will provide dental services for special health care needs patients, including children and adults, who have disabilities that prevent them from receiving routine or specialty care due to their physical, developmental, or cognitive condition. The ASC will include four operating rooms with ten pre/post-operative recovery beds. The MDAC will include eight new dental operatories, five mixed medical/dental treatment rooms, a sensory adapted waiting area, and a two-chair recovery room. The addition of these rooms will expand the Grantee’s capacity to treat more patients with special health care needs and reduce wait times as well as train the future workforce of professionals with the ability to treat patients with special health care needs. The Grantee anticipates it will serve approximately 8,400 special health care needs patients annually. Upon completion of the project, special health care needs patients will constitute 50 percent or more of the total number of patient visits of those receiving dental services in the project paid for with grant funds. Grant funds will be used for renovation expenses and the purchase of equipment and furnishings. Additional leveraged funding will be used to cover expenses that exceed the grant award amount. Staff evaluated the plan and has determined that the project is likely to be feasible and sustainable.
